Wire Less

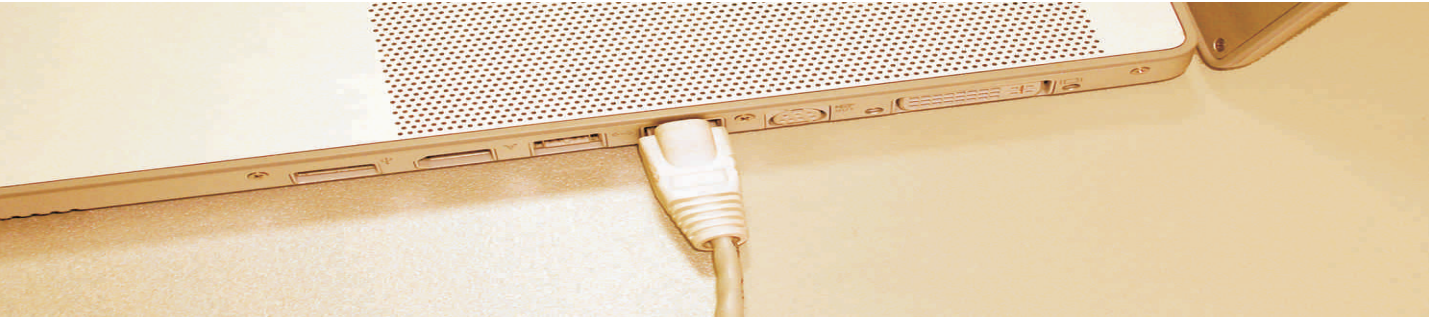

We provide range of enterprise Wi-Fi solutions in areas where conventional networks do not exist or are difficult to achieve. We also provide high performance Long Range point to point and point to multi-point wireless connections that bypass the need for expensive wired connections.

IP telephony

We have solutions for all your telephony requirements. You would enjoy the liberty of reliable, stable and secured services at very reasonable prices. By integrating high quality telephony services with the online world at very cost effective rates, this factor would definitely provide you the necessary zeal to expand your business and plunge into profitable business ventures without any slight tinge of tension.

Unified Communication

In today's fast-paced global business environment, people need to find, communicate with, and collaborate with each other quickly and easily. Kalyani Technologies can help you with Microsoft unified communications solutions to streamline communications between people and organizations, bringing together e-mail, calendaring, voice mail, IM and presence, VoIP, audio, video, and Web conferencing.

Network Solutions

Networking is one of the most important areas in Information Technology and a thrust area for the customer services business unit. Kalyani Technologies offers end to end solution in networking and communications.

Design and Consultancy

Kalyani Technologies' experienced engineering consultants offer end-to-end design expertise and help the customer eliminate costly errors and redesigns.

Utilizing high-level design practices,

- Recognize Customer Needs.
- Describe the Existing Network.
- Design Networking & Topology Solution.
- Plan the Network Implementation.
- Construct a Prototype Network.
- Fully document the design.

Network Infrastructure

Our end to end network solution ensures **Performance** - Consistent throughput for network traffic by non- blocking & distributed Switching Architecture and Critical components of Architecture like firewall routers etc. to meet current as well as future requirements.

High Availability - Avoiding a single point of failure at critical segments of the Network, achieving fast and predictable convergence time.

Scalability - Support fast and seamless growth without major disruptions.

Flexibility - Support new services without major overhaul of the network.

Security - Prevents flooding, broadcast traffic from spreading all over the network, and prevent DOS/ DDOS & other attacks.

Cost Effectiveness - provides perfect balance between cost and redundancy as well as pay as you grow capability without compromising on performance.

Structured Cabling

We offer a strategic and consultative approach to meeting our client's communication challenges. As a value-added reseller and integrator of structured cabling systems and specializing in data and voice applications, our goal is to ensure that the optimum solution is developed, and operational, when you need it.

We take great pride in providing structured cabling solutions that come with extensive warranties and are capable of outperforming any other in the marketplace. With partners and with the most thoroughly trained technicians in the industry, we are confident that you will find Kalyani Technologies a trusted partner.

Security and Surveillance Solutions

Provides fully integrated security solutions protecting everything from small offices and establishments to large multi-national organizations and high security Government facilities . Our integrated security solutions contribute to your competitive success by covering and eliminating all possible threats posed by the external and internal risk at your business. Kalyani Technologies believe in fully analyzing customers' needs, wants and preferences and plying suitable, cost effective solutions offering greater value to our customers. Working as a team with customers, our specialists engage in consultation and planning to design effective processes and optimize the results
